

Because we are constantly improving our product, the floor plan and rendering shown in this publication are conceptual only. More detailed and reliable drawings will be furnished to each customer as part of their Building Agreement.

THE CATALINA II

A four bedroom, four-bath model which has 3,790 square feet under air, The Catalina II model features 12-foot ceilings in the leisure room, kitchen, morning room, living room, and master suite. The home also offers a den with double doors and an attached three-car garage. Each bedroom in the home has direct access to a bath allowing them to serve as full suites.
